

HIGH-LEVEL STAKEHOLDER SUMMIT

Bringing together national and international decision-makers to address a specific global challenge and strengthen collaborations.

IWA WORLD WATER CONGRESS 2022

As part of the World Water Congress in Copenhagen, IWA hosted its first High-Level Summit on “Water as a Key to Action on Climate and the SDGs”, focusing on finance, governance, and partnerships. The summit added a political dimension to the congress, highlighting water’s critical role in achieving global climate and sustainability goals. Key messages were outlined in a call-to-action paper and later presented at COP27 and the UN SDG6 status conference in 2023.

Partners: The International Water Association (IWA), the Ministry of the Environment, the Ministry of Foreign Affairs, State of Green, Copenhagen Municipality, Confederation of Danish Industry (DI Water), and Copenhagen Legacy Lab.

2023 BWF WORLD CHAMPIONSHIPS

DI Water used the Badminton World Championships in Copenhagen to strengthen Denmark’s trade relations with several Asian countries (China, Vietnam, Indonesia, Thailand, Malaysia, and the Philippines). DI Water did this by hosting an international delegation of over 20 decision-makers during the championship week. The delegation participated in roundtable meetings, visited Danish water companies and suppliers, and attented a VIP event in Royal Arena during the quarter finals.

Partners: Confederation of Danish Industry (DI Water), Ministry of Foreign Affairs, State of Green, and Copenhagen Legacy Lab.
