

ORGANISATIONAL DEVELOPMENT

Developing the host association and the surrounding industry.

NORDIC BLOCKCHAIN CONFERENCE 2023

In relation to the conference in Copenhagen, Nordic Blockchain Association (NBA) established four steering committees to tackle some of the industry's most urgent challenges (lack of funding, outdated regulations, miscommunication, and need for cultural change). The steering committees should ensure that challenges are prioritised and addressed systematically to elevate the entire blockchain ecosystem.

Partners: Nordic Blockchain Association (NBA), The Confederation of Danish Industry (DI), and Copenhagen Legacy Lab.

GLOBAL DIY-SUMMIT 2022

As part of the summit in Copenhagen, the host organisation, Global DIY-Summit, initiated the 'DIY LEGACY PROJECT' to foster a more sustainable and responsible DIY industry. The project includes various activities, such as an annual trend report to track metrics related to sustainability, diversity, and inclusion. Today, the project is a key part of the organisation and its strategy.

Partners: Global DIY-Summit, EDRA (European DIY-Retail Association), HIMA (Home Improvement Manufacturers Association), Copenhagen Legacy Lab, and more.
