VI GØR DET LETTERE FOR DIG AT PASSE PÅ MILJØET

På energiområdet nedbringes CO₂-påvirkningen af klimaet med energibesparende belysning, styring af lys, varme og ventilation og meget andet. Virksomheden indrettes med vandbesparende toiletter, vandhaner og brusere, og rengøring og vask foregår under hensyntagen til miljøet. Desuden skal virksomheden udarbejde en miljøpolitik og løbende fastsætte nye mål for miljøarbejdet. Alt dette foregår med en løbende uddannelse og involvering af personalet.

Alle Green Tourism Organization virksomheder bliver godkendt af et særligt panel af eksperter og kontrolleres løbende for at sikre, at de lever op til kravene.

WE MAKE IT EASIER FOR YOU TO CARE FOR THE ENVIRONMENT

Regarding energy the business reduces CO₂ climate impact by energy-efficient lighting, control on lighting, heating and ventilation. The business is equipped with water-saving toilets, faucets and showers and cleaning and washing is done with respect for the environment. In addition, the business must prepare an environmental policy and continuously set new goals for environmental work. All this is done with an ongoing education and involvement of the staff.

All Green Tourism Organization companies will be approved by a special panel of experts and checked regularly to ensure that they meet the requirements.

KORT OM GREEN TOURISM ORGANIZATION

Green Tourism Organization er et miljømærke for turistorganisationer og er en søsterordningen til Green Key og følger samme tankegang, principper og kontrolforanstaltninger som turismens internationale miljømærke.

Ordningen belønner turistorganisationer, der tænker bæredygtigt og gør en ekstra indsats for at passe på miljøet og den omfattede destination. Det sker ved både at gøre en indsat i forhold til eget kontor, men også ved at informere og arbejde for at turister, andre turistvirksomheder og samarbejdspartnere bidrager til og støtter op om bæredygtig turisme.

ABOUT GREEN TOURISM ORGANIZATION

Green Tourism Organization is an eco-label for tourism organizations and is Green Key's sister label, therefore it follows the same way of thinking, principles and control measures as the tourism industry's international eco-label.

The scheme rewards tourism organizations that think sustainably and makes an extra effort to take care of the environment as well as the destination itself. This is done by both improving the environmental efforts at their own office, but also by informing and engaging tourists, other tourism companies and partners to support and contribute to a sustainable tourism industry.
